

Scientific writing

Inhalt	Research articles are preferentially submitted to English-language journals because of their higher distribution and impact. Although most articles are rejected on the grounds of insufficient scientific content, a well-written article increases the chances of getting accepted. The theoretical part of this seminar focuses on pre-writing elements, the structure of research articles, on writing in a clear and concise manner as well as on common errors of German native speakers. The interactive part consists of exercises on grammar, style and usage as well as a writing exercise.
Zielgruppe	Physicians, scientists, academic staff, students
Termin	20.10.2017, 09:00-13:30 Uhr
Ort	Seminarräume UKR
Referent/in	Monika Schöll BA (Open), Zentrum für Klinische Studien
